When: Tuesday the 3th of May 2011, from 12.30 till 18.00

Ken Yeang

Llewelyn Davies Yeang

A branch leader on green highrise, his designs focus on sustainable and beautiful living spaces for the modern urban man.

Richard Horden

Horden Cherry Lee Architects

An important representative of the high-tech style, he combines the elegance of sailing and beauty of technology in architecture.

Francine Houben

Mecanoo Architecten

One of the key figures in today's architecture, with many famous projects such as the montevideo-tower and the TU-library.

Niccolo Baldassini

RFR Paris

A specialist in high geometrical complex structures, cable structures and structures that integrate transparent skin.

André de Roo

Arcadis

Head structural Engineer at Arcadis, with disciplines in concrete and steel structures and high rise buildings.

This years edition of the 'The Value of Design 2011' is an afternoon symposium on architecture, structural engineering and the overlapping areas of these two disciplines.
